Dear Sir/Madam

We are excited to have you and your team join us at **Security Exchange 2025**, M.Tech's annual conference and tradeshow dedicated to cybersecurity. Centered on the theme **'What's Next For AI'**, it is happening on **15 May 2025, 9am to 4pm**, at Sands Expo & Convention Centre.

At Security Exchange, you will discover how you can harness the power of AI for your organization, as we focus on two specific areas – **AI Governance** and **Post-Quantum Cryptography**.

There will be insightful discussions on the advancements in AI Governance as well as the latest solutions to protect AI from threats like data poisoning, supply chain attacks and data extortion.

Stay ahead in this quantum era as our industry experts share with you how quantum cryptography, including the implementation of NIST Post-Quantum Cryptography standards in products and systems, can future-proof your security strategies.

You will also have an opportunity to hear directly from Chief Information Officers (CIOs) and practitioners about the strategic and practical implementation of AI in their organizations balancing cybersecurity risks. Discover their approach and best practices to ensure ethical and secure deployment of AI within their organizations.

You can also look forward to valuable networking opportunities where you connect with industry experts and product vendors, as well as discover cutting-edge AI solutions that elevate your organization's security posture.

Joining us at Security Exchange 2025 undoubtedly contributes to your organization's improved security and increased efficiency in this AI-powered era.

Secure a place by registering your interest here – <https://sxconference.com/>

For further information, feel free to reach out to us at sgmarcom@mtechpro.com.

We look forward to seeing you.
